

Biology Pamphlets Volume 509

By -

RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 26 pages. Dimensions: 9.7in. x 7.4in. x 0.1in. This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1900 Excerpt: . . . p. 14). Toward phanerogams silver is much more toxic than mercury, --being fatal to Zea, and--to 102400 204800 Lupinus (Heald 96, p. 152). At the concentrations used the AgNO₃ would be practically entirely ionized (Kohlrausch, 85). Cadmium nitrate, Cd(NO₃)₂; 0.075, 6.1, 24. Ranking closely with silver as a poison for the higher plants, cadmium proves to be very highly toxic to the mold fungi. Perhaps the most marked feature in the cultures with cadmium was the very wide range between the killing point and the point where development was only noticeably injured. It will be noticed that the ratio of its coefficient of injury to that of HgCl₂ is less than 3: 1, while the ratio between their death points is 75: 1. A second striking feature of the toxicity of cadmium is the great variation in the specific resistances of the different...
