ON ROTATIONS OF CROPS. History. --Theory. --Influence of circumstances. --Continuous corn cropping. -- Norfolk rotation and modifications of it. -- Berwickshire rotation and modifications of it. --Six-year, seven-year, and eight-year rotations. -- Catch cropping. --Restrictive clauses of leases. In the early husbandry of this and other countries, the practice was to take as many crops of corn, varied occasionally with one of pulse, as could be grown in succession; after which the land got a years bare fallow, or was left a number of years under grass. The arable land was divided into two parts; one-third or one-fourth infield and the remainder outfield; the proportion of the former being determined by its proximity to the farm-yard, and the amount of dung produced there. The infield was arranged in three divisions, each of which was cropped successively with (1) wheat or barley; (2)...
