STUDIES ON SALT TOLERANCE IN COTTON (GOSSYPIMUM HIRSUTUM L.)

LAP Lambert Academic Publishing Jun 2012, 2012. Taschenbuch. Book Condition: Neu. 220x150x6 mm. This item is printed on demand - Print on Demand Neuware - The present investigation was carried out with 32 upland cotton (*Gossypium hirsutum* L.) genotypes under both normal and saline alkaline conditions, to identify the salt tolerant genotypes, to study the extent of variability, association among different traits, direct and indirect effects of yield components and genetic divergence among the genotypes. Based on the combined ranking...

Reviews

This ebook is great. It is definitely basic but shocks from the 50 percent of your publication. Its been printed in an exceedingly basic way and it is only right after i finished reading this book where basically changed me, modify the way in my opinion.

-- **Mckayla Ritchie**

This is the finest book i have got study right up until now. I am quite late in start reading this one, but better then never. Once you begin to read the book, it is extremely difficult to leave it before concluding.

-- **Keanu Johns**
