Not illustrated. 1876 Excerpt: . gold filling in large and difficult cavities is long, tedious, and, frequently, painful, and there are many patients who either cannot or will not submit to it. Lastly, exceptional cases occasionally present themselves, as for example, in neglected caries of a front tooth, in which the crown--the preservation of which is of great importance--is so extensively excavated as to form a mere thin shell of enamel, incapable of withstanding the force required in gold filling. In all such instances the substitute for gold best adapted to the circumstances must be employed. With Sullivan's cement, the author in hospital practice alone has filled and saved in a useful condition numbers of grinding teeth which must have been lost had there not been available any such material, at once inexpensive and rapid of application; whilst he has seen an equal number of fragile front teeth preserved...
